<i>Description: This project specifically consists of the development of the Water Reclamation Facility (WRF), AWP Facility, Visitor Center, Solids Handling Facility (SHF), and System Integration of the East County AWP Project all located within the boundary of the existing Ray Stoyer WRF. The project comprises the redevelopment of approximately 29 acres of the existing Ray Stoyer WRF property. The proposed new WRF will be configured along the north/south axis of the site to align the hydraulic profile of the process units with the natural grade of the site. This layout will minimize the excavation depths and earthwork cut/fill required at the site. The proposed AWP Facility will be located at the southern end of the WRF, and the proposed SHF will be located at the northern end.</i>
